

This is your first assignment in the Practice Programming Environment (PPE)!

Make sure you have viewed the previous video where Drew introduces the PPE and walks you through completing assignment **oo\_hello** .

Launching the PPE takes you to your home folder. To get to this assignment, enter the following into the terminal: *\$ cd learn2prog/oo\_hello*

There is a README for this assignment in the oo\_hello folder. To pass this assignment, don't forget to add your 'hello.txt' to git, commit and push it, and then run the *grade* command.
